Ignite your future!

Data Science & AI Bootcamp

Master Real-Time Industrial Projects with Top Tools & Expert Guidance!

4 Months Online Programme

Lets Talk About Some Stats

Agentic AI is transforming how individuals and organizations interact with technology by enabling AI systems to reason, plan, learn, and autonomously execute complex tasks. An Agentic AI bootcamp equips participants to build intelligent AI solutions using Python, Large Language Models (LLMs), and modern AI frameworks.

Participants will learn to develop AI agents, RAG applications, chatbots, and deep learning solutions while integrating tools, APIs, memory, and autonomous decision-making. These skills empower individuals to automate workflows, solve real-world problems, and build intelligent systems for an AI-driven world.

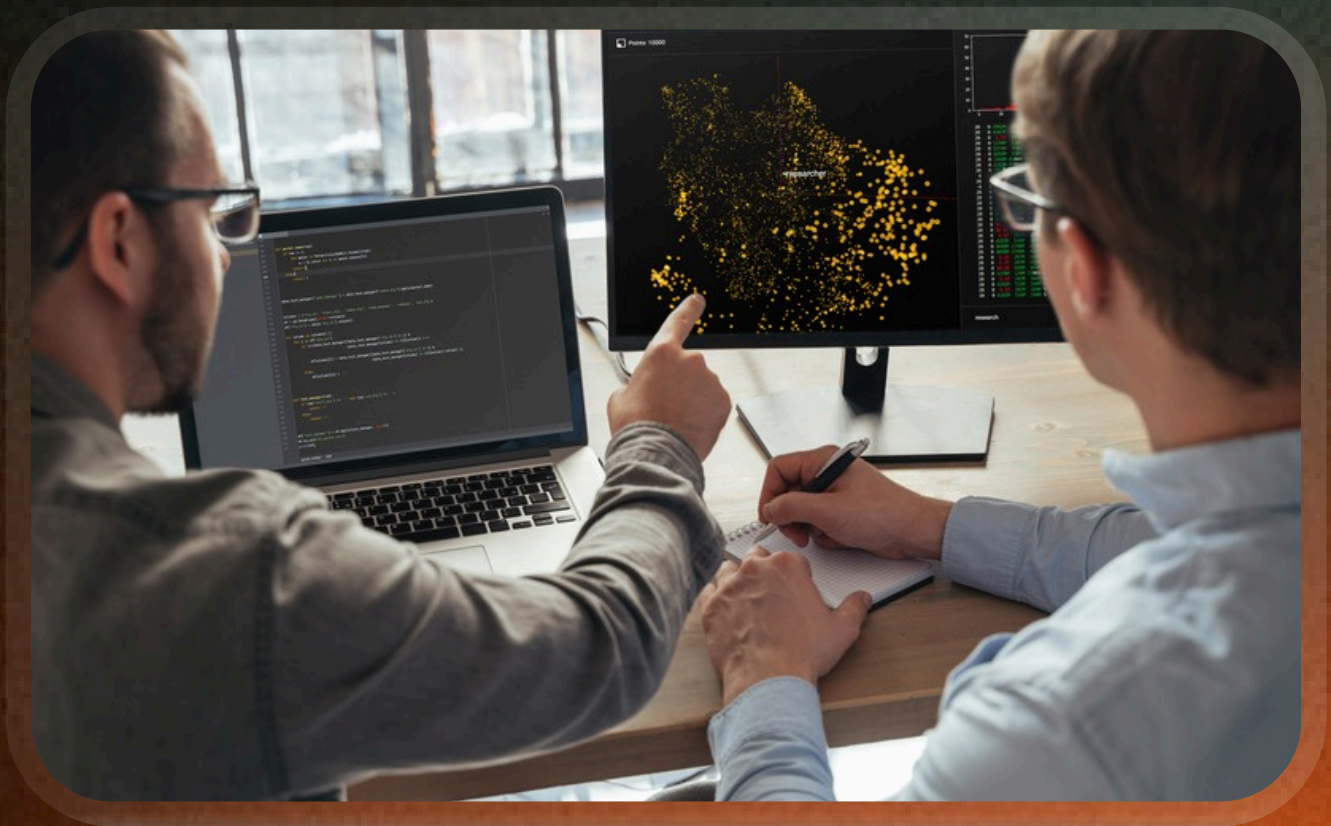

Course Description

Welcome to the Data Science Bootcamp by DataCrumbs — a career-focused program designed to build practical, industry-ready skills in Data Science, Machine Learning, and AI.

Learn Python, SQL, Databases, Power BI, Scikit-learn, Machine Learning, Deep Learning, CNNs, Generative AI, and Agentic AI through hands-on, real-world projects.

You'll also learn how to build AI chatbots and agents, implement authentication and APIs, and deploy AI and data science applications to production.

With expert guidance, quick doubt resolution, job support, and a community forum, you'll gain the skills and project experience needed to pursue opportunities in the data and AI industry.

Who Should Attend

Students & Fresh Graduates: Individuals from Computer Science, Engineering, Business, Economics, Mathematics, Statistics, and related fields who want to build careers in AI, Data Science, and Agentic AI.

Aspiring Freelancers: Anyone looking to learn how to build and deploy AI agents, automations, chatbots, and data solutions and turn these skills into freelance opportunities.

Working Professionals: Professionals looking to transition into AI, Data Science, Machine Learning, and Agentic AI, or use AI to improve their existing work and services.

Our Instructors

Our instructors have been amongst the top 0.4 % of data scientists in Kaggle (The largest community of data scientists)

Abis Hussain Syed

Data Scientist

5+ years Experience in computer Vision and making AI powered automated business pipelines.

Bilal Saeed

Data Scientist

Senior Data Scientist with 7+ years of experience specializing in business intelligence, cloud technologies

Shahrukh Mirza

Data Engineer

6+ years of experience by which he can navigate complex datasets and develop robust predictive models

Adeel Ejaz

Principal Data Analyst

A Principal Data Analyst with 7+ years in B2B SaaS, focused on revenue ops and KPIs, brings expertise in Python, SQL, and Power BI

Mahnoor Khaliq

Backend Developer

She contributed to projects focused on developing scalable applications that enhance user experience and streamline data management.

Muhammad Owais

AI Team Lead

An AI Engineer with 3+ years in Generative AI and chatbots, blending math and creativity to build impactful solutions and inspire students

Mujeeb ur Rehman

Machine Learning Engineer

As a AI Engineer with 5 years of experience, he has developed AI solutions using Large Language Models and Diffusion Models for impactful results

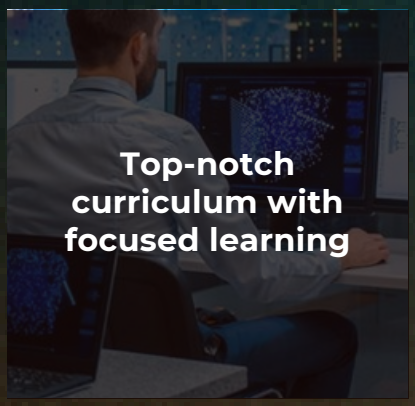

The only data science program in the industry with:

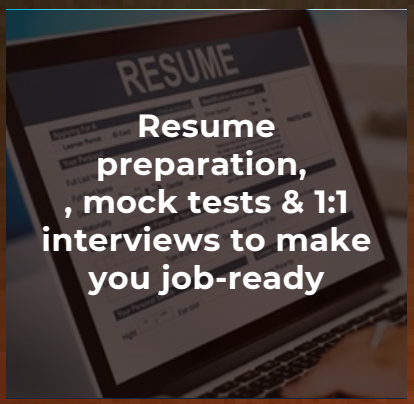

The Data Science & AI Bootcamp

AI Web Development

- AI Coding Assistants (Antigravity & Lovable)
- Prompting for Code & React Fundamentals
- Vercel Cloud Deployments
- AI-Generated Modern UIs & React State
- Public AI API Integrations & Rapid Debugging
- Dashboards

AI Backends & Cloud Databases

- AI Database Architecture
- Prompting AI for Schema Design
- AI User Authentication & Session Security
- Row-Level Security (RLS)
- Dynamic AI CRM Backends
- Next.js Serverless Pipelines for AI Apps

Generative AI/N8N

- Intro to Generative AI
- Foundation Models & LLMs
- Gemini/OpenAI/DeepSeek
- Prompt Engineering
- Multimodal Models (Text , Image and Audio)
- Retrieval-Augmented Generation (RAG)
- Introduction to LangChain
- n8n / workflow automation for pipelines & ops

Core LLMs & Autonomous AI Agents

- LLM API Integrations & Token Optimization
- AI Persona Design & System Guardrails
- Structured Outputs & AI Extraction Engines
- Autonomous eCommerce AI Sales Agents
- Resume Parsing & HR AI Hiring Agents

The Data Science & AI Bootcamp

Agentic AI Tools, Memory & MCP

- AI Agent Function & External Tool Calling
- Real-Time Database Querying by AI
- Conversational Short/Long-Term Memory
- Context Window & AI Memory Buffers
- Model Context Protocol (MCP) Standards
- Custom MCP Servers for Local AI Datasets

Agentic AI & Autonomous Systems

- Production Vector RAG Pipelines & Embeddings
- Multi-Modal Vision & Whisper Voice AI Assistants
- Autonomous Social Media AI Agents (Cron Jobs)
- Multi-Agent Orchestration & Supervisor Workflows

Freelancing & Client Acquisition

- AI & Automation Portfolio Projects
- Personal Branding & ICP Target Research
- Cold Outreach / Pitching
- Proposal Writing & Retainer Pricing
- Client Delivery & Retainer Strategies

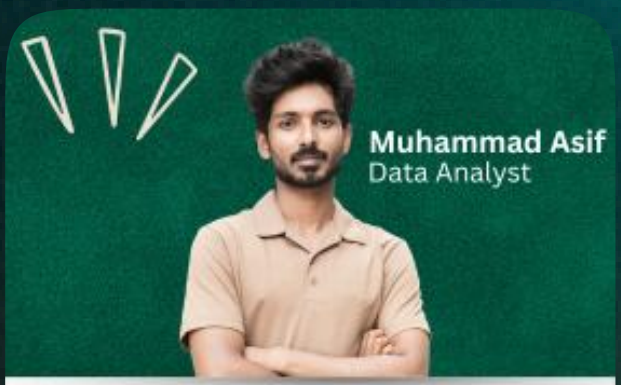

After the lectures, you'll have a one-month internship, plus sessions on CV crafting and mock interviews to ace interviews and build a personal brand and portfolio

Your learning matters. Check past student reviews to make an informed choice.

Become a part of the DataCrumbs family
and watch your career soar!

The PowerBI course taught me so much about data visualization. I can now create professional dashboards that make my reports look amazing. The step-by-step guidance and practical sessions were incredibly beneficial.

The PowerBI course was a great investment. I learned how to create professional-looking dashboards that are very useful for my job. Highly recommend it!

This BootCamp was a game-changer! The projects and advanced topics helped me improve & automate my business intelligence skills. Highly recommend! The instructors were supportive and knowledgeable.

Great course! Learned Python from basics to advanced. The hands-on projects were invaluable. I easily transitioned into a data analyst role. The curriculum was well-structured and engaging.

Why Join This Bootcamp?

Master AI-powered skills to land high-paying freelance projects and stand out in a competitive market.

Our alumni work at reputed technology companies and promising startups

DataCrumbs

Ignite Your Future!

DataCrumbs is Pakistan's first data-focused edtech platform, delivering premium courses to upskill the workforce. We provide exclusive access to job support, doubt resolution, and a community forum. Our Data Science BootCamp equips you with the knowledge and confidence to pursue advanced roles in Data Science development, unlocking numerous career opportunities. Join DataCrumbs and ignite your future with cutting-edge Data Science and AI skills.
